EDUCATION

University of California, Davis

Davis, CA

Bachelor of Arts | Economics: Econometrics & Quantitative Economics

2019

Relevant Coursework:

- *Time-Series & Financial Econometrics, Probability & Statistical Modeling, Business Data Analysis, Game Theory, Health Economics*

Certifications | IIBA & Coursera

IBM Data Science | Google Business Intelligence | Agile Analysis

Technical Skills

- **Languages** – Python (NumPy, pandas, SQLAlchemy, scikit-learn), SQL, R
- **Data Engineering & Pipelines** – ETL Development, Data Validation, Informatica PowerCenter, Talend, FME Desktop
- **Platforms & Tools** – Tableau, Salesforce, ArcGIS Pro, Git

EXPERIENCE

Infosys

Richardson, TX

Business/Technical Analyst

October 2024 – Present

Financial Services Client

- Led cross-functional stakeholder sessions to document business requirements and validate data across 5+ internal systems.
- Performed root-cause analysis on 400+ data categories, delivering executive playbooks that reduced data quality issues by 35%.
- Mentored 2 junior analysts on validation standards and reporting methodologies.

Energy & Utilities Client

- Developed Python automation scripts to transform and secure ~100,000 client records, reducing processing time by 99% (24 hours to under 5 minutes).
- Managed geospatial datasets in ArcGIS Pro, producing attribute-level reports that informed regional business strategy.
- Built and maintained ETL pipelines in FME Desktop, integrating web services and automating data quality checks.
- Led data validation, migration execution, and defect resolution across cross-functional stakeholders.

Verizon

Irving, TX

Data Analyst

June 2021 – June 2024

- Owned migration of client and contract datasets to Salesforce via Python ETL pipelines supporting onboarding of 2,000+ stores in 3 months.
- Optimized Tibco data workflows, reducing execution latency by 96% (~2 hours to under 5 minutes).
- Built probabilistic prediction models in R and scikit-learn, reducing forecast error from 23% to under 5%.
- Developed data validation routines using pandas and Informatica PowerCenter.
- Led a team of 3 analysts in building client contract dashboards using regression and multivariate anomaly detection.

Element Technologies Inc.

Piscataway, NJ

Data Analyst

February 2020 – June 2021

- Built consumer segmentation and forecasting models using financial and operational datasets for Kaiser Permanente.
- Analyzed insurance policy utilization data to support payment optimization and revenue cycle reporting.
- Built Python ETL pipelines to extract and transform Oracle data sources for cross-site data migration.
- Implemented SQLAlchemy data transfer workflows with lineage tracking across distributed systems.

Projects

Bearded Seal Analysis | R, Statistical Modeling

- Built a modular R package for biotech research to analyze phenotypic deviations using stepwise regression, ridge regression, and K-means clustering.
- Designed parameterized inputs enabling year-over-year temporal analysis.
